

Voices of Storm Water Video Prompts:

Please record a short 30 second video of yourself following the layout below. We will be using the intro and outro you record as part of our promo film, so please record yourself saying the exact words and then share your story or thoughts in between! Thank you so much for sharing your voice!

“Hi, my name is (your name), and I am a voice of storm water.”

(Then, in your own words, tell us why storm water or water quality is important to you in 30 seconds or less. Think drinking water, recreation, wildlife, scenic, water conservation, etc.)

“Storm water is not just important to me, but to the community. And together **we** are the voice of storm water.”
